

MISSION STATEMENT:

We strive to provide an environment of respect, compassion, and patient satisfaction. Our ultimate goal is to relieve pain, increase productivity and improve quality of life by using the most technologically advanced and minimally invasive pain treatments available in a pleasant and caring environment.

What is Interventional Pain Management?

According to the American Society of Interventional Pain Physicians (ASIPP), interventional pain management is a “discipline of medicine devoted to the diagnosis and treatment of pain related disorders.” Interventional pain medicine utilizes a multidisciplinary approach, in which a team of healthcare professionals work together, to provide a full range of treatments and services for patients suffering from chronic and/or acute pain.

The goals of interventional pain management are to relieve, reduce, or manage pain and improve a patient’s overall quality of life through minimally invasive techniques specifically designed to diagnose and treat painful conditions. Interventional pain management also strives to help patients return to their everyday activities quickly.

REGENERATIVE CELL THERAPY

Raul A. Monzon, M.D.

ANESTHESIOLOGIST

Specializing in Pain Management
and Regenerative Cell Therapy

FEEL THE DIFFERENCE.

RAUL A. MONZON, M.D.

Dr. Monzon founded Pain Management Specialists of North FL, PA in 1998. He received his medical degree from UCE, School of Medicine in the Dominican Republic with honors. He completed a four-year residency in General Surgery as Chief Resident at Jersey City Medical Center in NJ, and an Anesthesiology residency at the distinguished Seton Hall/St. Joseph Hospital in NJ where he also served as a Chief Resident with a concentration in Thoracic Anesthesia and Pain Medicine. He moved to Palatka in 1990 and co-founded the first pain clinic in Putnam County at Putnam Community Hospital where he served as the Chief of Anesthesiology and Pain Management.

In 1998, he founded the first freestanding Pain Clinic in St. Johns County. Dr. Monzon is a pioneer of interventional pain medicine who was one of few pain doctors to introduce Implantable

“The ultimate goal is always to provide our patients with sustained relief without masking the pain by using pharmaceuticals that can also bring unwanted side effects and addictive potential.”
